

BACKEND + INTEGRATIONS SPEC

Responsibilities:

- Create Supabase schema (leads, quiz_sessions, deliverables, content_items).
- Generate migrations automatically.
- Build API routes: /api/quiz/submit and /api/widget/submit.
- Implement GoHighLevel sync with tagging rules.
- Implement email delivery provider integration.
- Set up ISR revalidation for SEO content.

Autonomy Rules:

- If Supabase keys missing, pause and request.
- If GHL webhook missing, pause and request.
- Do not hardcode secrets.
