MYB MASTER ORCHESTRATION DOCUMENT

Purpose: Spawn and coordinate autonomous agents inside Anti-Gravity.

Execution Instructions for Anti-Gravity:

- Spawn 4 autonomous agents simultaneously.
- Assign each agent its corresponding PDF spec.
- Agents must work in isolated branches in GitHub.
- Merge order must follow Backend → Routing → SEO → Design → Motion → CRO final pass.
- Pause only for API keys or environment variables.
- All Supabase migrations must be auto-generated and applied.
- All code must pass type/lint checks before merge.

Agents to Deploy:

- Agent 1: Backend + Integrations (Claude Technical)
- Agent 2: Routing + Quiz Logic (Claude Reasoning)
- Agent 3: SEO + Content System (Gemini Large Context)
- Agent 4: UI + Motion + CRO (Claude Creative + Technical)
