Client Onboarding - Standard Operating Procedure

Presented By Jeremy Haynes

Department: Project Manager or Account Manager

Estimated Time: 15 Minutes - 1 Hour

Goal/Intention: Once a client is closed and ready to be onboarded into the agency, this is a document to follow that will help successfully get everything from the client to start delivering results for them.

Tools Needed:

- Google drive or dropbox
- Kajabi, teachable or any other membership area, can even be youtube videos in a playlist
- Whatever tools the clients have that you will need access to
- Gmail or any other email sender
- docusign

Process:

1. Once the client is closed, ensure they sign the agencies legal agreement declaring what is going to be done in the deal and on what terms via docusign
2. Once both parties sign the agreement, send out an onboarding email detailing instructions

to Matt, Leo

Hey Matt!

Reaching with actions for Monday launch. Also having Leo reach out to coordinate call time for Monday that works for you.

Here's the action items I need you to knock out:

1. put all of the approved images and video for ads into a google drive folder or dropbox for us and then send it over
2. Send me over the logins for the following:
    1. clickfunnels
    2. typeform or any other form tools
    3. zapier
    4. scheduleonce or calendly
    5. your CRM
6. Get set up in the FB page we'll be marketing from as an admin
7. Get set up in the ad accounts we'll be marketing from, preferably 1 for marketing content, and a second ad account focusing on the conversion campaigns.
8. If there is no 'business manager' set up for the business, we will help do that first, and then will walk you through the above 2 steps on a zoom together, and will add ourselves.
9. Invite me into slack or whatever tool you use to communicate with team, if you don't have one already we recommend telegram and can create a group if needed
10. We sent over an agreement via docusign, get that signed and sent back to us and we'll be good to go! (sent to Roland)

Looking forward to launching on the 20th of July!

Talk soon,

--

3. We want to ensure that when we are running ads, that we have a google drive or dropbox folder full of approved images and videos for what the client wants us to market for them
    a. This helps speed up the process of launching the ads
    b. We want ads, and content in this folder
        i. If anything is to be added, then send over clear examples of what needs shot - we encourage having the client do this BEFORE onboarding them as a client so we can start driving results ASAP after charging them, rather than having to wait for creatives
4. Get all the logins you need so you don't find yourself asking them ongoing.
    a. This generally means clickfunnels or wordpress access, zapier logins, CRM logins, and anything else we may need that the client specifically uses
5. We also need to be added into the different ad channels as admins ideally for all ad channels we'll be managing
    a. We want to be added as admins so we're not constantly going back and forth with the clients on little permissions that need granted, this slows everyone down
    b. Be sure to get admin for any pages, or channels along with business manager or master client control admin rights
6. Do a full sweep once they send everything over and grant access to everything to ensure we have everything we need to be successful
7. Pro tip - you can create a series of videos you want them to watch in order to walk them through all these steps, and explaining why you need what so you avoid the additional back and forth
8. You can also have a video explainer and a form with questions to extract information like key customer demographic traits and any other information you may want to collect to efficiently onboard the client
9. The goal of onboarding is to get everything needed to get results FAST, we do not want to this to drag out for more than hour after charging the client - that way everyone can get to work on producing revenue
10. Once we have everything we need, we get started on whatever we sold the client on doing
    a. This typically starts by updating all the audiences in the ad channels to what we need, creating lookalikes or similar audiences
    b. Writing ad copy
    c. Ensuring marketing automation is effective and up to standards
    d. Then getting everything approved by the client and launching the ad campaigns same day as onboarding or day after latest since we get paid every 30 days
